

JC-600 Case Packing Line

QUICK DESCRIPTION

JC-600 automatic packing and palletizing machine is a fully automatic packaging equipment that integrates unpacking, upstream product stacking, packing, sealing and other processes. It is the most ideal solution to solve the problem of small packaging space at the end.

TECHNICAL PARAMETER

Model	JC-600
Production capacity	Less than 200 (boxes/hour)
Robotic grasping production capacity	10 (times/min)
Sealing method	Tape or hot melt adhesive
Carton size	Min300x250x200mm Max 550x500x400mm
Power supply	380V 50HZ 7.5KW
Air pressure	0.6mpa
Air consumption	Less than 1 ³ m/h
Dimensions	5000x2000x2900mm
Weight	2500kg
Main material	Aluminum alloy, 304 stainless steel
