

# JCL-260

## Flat/Irregular Lollipop Wrapping Machine

### QUICK DESCRIPTION

This machine is a special equipment designed for lollipops with irregular shapes. It uses hot-air packaging materials to pack lollipops (such as OPP, CPP, PET, aluminum film, etc.). It has the fastest speed. Over enough to reach 200ppm. Lollipop feeding needs to be done manually.

### TECHNICAL PARAMETER

Model	JCL-260
Product capacity	200pcs/min
Voltage	220/380V
Power	3kw
Packaging bag specification	60*60*22mm
Weight	1000KG
