

JCL-300

Automatic Flat/Irregular Lollipop Production Packaging Line

TECHNICAL PARAMETER

Model	JCL-300
Capacity	300-350pcs/min
Motor Power	3kW 220V
Hot Seal Electric Heater	Strip pulling insulation electric heater: 1.8KW
Heat Rope Sizer	0.4KW
Wheel Motor Power	0.025KW
Candy Stick Size	φ3.8×78MM
Wrapping Requirement	Width B=70mm (based on the specification of the candy)
Composite Wrapping	0.04MM
Paper Thickness	OPP PVC OPP/CPP PT/PE and so on
Wrapping Material	(suit for lollipop heat sealing)
Weight	2200KG
Dimension	3410*1375*2019MM

QUICK DESCRIPTION

This machine is a die-forming, manufacturing and packaging line for irregular-shaped lollipops. The front end is connected with a batch roller for candy, which fully automates production and packaging. Its maximum speed can reach 350ppm.
