

JCT-250 Automatic Single Piece Wet Wipe 4 Side Packing Machine

QUICK DESCRIPTION

The machine is modified from the horizontal form fill seal machine, making it suitable for the production and packaging of single-piece wet wipes. Its functions include folding the raw material, then cutting, bagging, adding liquid, and sealing. Its maximum speed can reach the fastest 120ppm.

TECHNICAL PARAMETER

| | |
|----------------------------|--|
| Model | JCT-250 |
| Package style | Four-side seal |
| Packaging Materials | CPP,PE,BOPP |
| Raw material core diameter | Φ 75-80MM |
| Package (finished) length | 40—175mm |
| Width | 40—110mm |
| Folding method | Up to 10 folds vertically, up to 40 folds horizontally |
| Dosing range | 0-10ml |
| Packing speed | 80-120 pieces/min |
| Total power | 5KW |
| Power Type | Three-phase four-wire 380V |
| Machine noise | ≤64.9dB(A) |
| Gas source | 0.6-0.8MPa |
| Air consumption | 300-500ml/min |
| Machine size | 3800mm×2600mm×1800mm |
| Wet wipes material | 30-120g/ m ² clean paper, wet strength paper, spunlace non-woven fabric |
| Machine weight | 1100kg |
